

Havasupai Pack Animals Need Your Help!

If you have visited Havasu Canyon on the fringe of the Grand Canyon, you are familiar with the beauty of the landscape. However, what you might not have known is the horrible and cruel treatment of the pack animals which are forced up and down the canyon. These burros, donkeys and horses are seriously undernourished and then burdened with loads which often cut their flesh down to the bone. I-Team has done an expose on these tortured animals which you can watch here, but we warn you some of the footage is graphic. We welcome you to share the video far and wide and visit Stop Animal Violence (SAVE) website for more ways which you can help.

All Horses Deserve a Better Life. While we focus our efforts on Mustangs primarily, we wanted to bring attention to this ongoing tragedy near the Grand Canyon.
